

Brush Pusher

Heavy Duty Pusher for Front or 3-Pt. of Tractor

This heavy duty brush pusher is designed to float. It's tines are mounted under the frame and work like skis to follow the contour of your orchard floor. The easily replaceable tines are flattened on the ends and mounted close together to pick up smaller brush.

The heavy duty backstop is tapered towards the top to minimize tree damage. Added brush guards on the top and sides prevent brush from sliding around or over the pusher.

FEATURES:

- Heavy Duty, 7 foot replaceable tines.
- HI-LO and 3-point mounts are standard. Bobcat mounts available.
- Floats to follow contour of ground.
- Brush guards top and side.
- 7 FT wide at the bottom and tapered at the top to avoid tree damage.
