

Economy Lifts

HI-LO - Three Point

Now for little more than the price of a three point you can have the versatility of a HI-LO. With many models available for both 3-point and front mounting, you can get the right lift at the right price.

Most models have 3000 lb. load capacity and are available in lift height from one foot to eight foot in single and two stage models. Hi-lift models have high carbon steel tines, a 3" inch double acting cylinder with two lift chains and all roller lift channels and carriage for smooth long life operation.

With good visibility on all models, you can quickly and easily move boxes around orchard or field. With HI-LIFT models you can load or unload bulk boxes onto truck or trailer in the field with no need for additional lifts. We also offer a set of 3-point forks with a hydraulic lid for cherry tanks.
