

3 Point Frost Fans

***“Put air where
you need it...
when
you need it.”***

Protect up to ten acres of fruit or vegetables for pennies per hour. By using our new **SEVEN FT. or FIVE FT.**

DIAMETER frost fans directly on your tractor’s P.T.O. you can greatly increase your natural air drainage. With three point hitch mounting, this unit can be moved to protect whichever crop is most critical at the time.

The placement of this fan in lower areas or valleys of your orchard or fields will push the colder stagnate air out, forcing it’s replacement with warmer air from higher levels. The effective coverage area will be approximately 500 ft. wide and 1/4 mile long depending on the contour of the land and conditions.

This area of increased temperature will include all the low area on both sides, behind and in front of fan.

5 FOOT AND 7 FOOT FANS AVAILABLE.

5 FT. fan requires a minimum of 60 PTO HP. — 7 FT. fan requires a minimum of 80 PTO HP.
