

# Root Pruner

## "ADVANTAGES"

- Slows growth of over vigorous trees.
- Increased firmness and storage life of fruit.
- Gives better color to red varieties.
- Greatly decreased dropping of fruit at harvest.
- Single and double row models available.

This new tool with it's many features hooks directly on 3-point hitch of tractor and can easily be adjusted to row width.

The **Root Pruner's** unique one way tapered cutting edge, for easier pulling can be set to different cutting depth's and also has a shear bolt to protect the tool, if blade contacts underground rocks.

The **Root Pruner's** adjustable skid plate and tree sensor keeps tool at a consistent distance from tree and cutting depth. This plate also seals the ground back around the cut to prevent root sprouting.

These many patented features make the **Root Pruner** a valuable tool for many varieties of fruit with the proven results of better fruit with less chemical use and pruning costs.

## "FEATURES"

- Heavy duty construction.
- Adjustable to row width.
- Hardened and special cutting edge.
- Adjustable skid plate.
- Replaceable tip.
- Adjustable tree sensor.
- Shear bolt and depth adjustment on blade.
- Tool stand for safe and easy hook-up.

## "OPTIONAL"
