

Hydraulic Wire Winder

This unit was designed to rewind wire from trellis and grape plantings where it is no longer needed. The wire winder also winds the wire into standard coils so it can be reused in new plantings.

- Easily mounts on forklift or 3 pt. forks, with 4-way entry fork tubes so wire can be wound from any direction
- Hydraulic valve for easy operator control of speed, start and stop of winder
- Lever controlled wire guide to control the even winding of each coil
- Slots in front and back plates to allow easy tying of coil before it is removed from winder
- Wing nut for fast and easy removal of outer plate to remove coil from winder
- Hydraulic valve and motor runs off remote outlets of tractor or forklift hydraulic system
